THAI CHI CUONG

SOFTWARE DEVELOPER
DATABASE ADMINISTRATOR

EDUCATION

HCM University of Science

2017 - 2021

Average grade 7.82/10.

I have a dream to be a database administrator and a software developer. I started this thing about 5 years ago, when I was a student at high school. In that time, I started learning Pascal as the first step. After a time, I changed to be a software developer with C/C++ learning by myself and then starting my first game with OpenGL. At the time that I had to choose university, I chose HCMUS as the first wish.

ACTIVITIES

I was joint *Game Jam 2019* with two another members.
Challenge 2019 was held by HCMUS.

OBJECTIVES

When I was a two years student at university, I chose Information System to be my major because of their knowledges that I could not receive in other places. The way I am going maybe not success or better others, but I have a wish on it. I hope I can be a Fresher Backend Developer at VNG Inc.

HONORS & ADWARDS

The second prize at Provincial IT Merit Competition - 2015
